## **CDPH Ebola Situational Update (New)**

The risk of Ebola importation into California is very low.

The California Department of Public Health (CDPH) will be actively working with the healthcare community and local health departments in protecting the people of the state from possible Ebola importations.

The key CDPH objective for Ebola prevention is early identification of potential cases and avoiding spread of the disease.

CDPH will shortly be distributing information to local health departments and health care providers in California that will help them manage recent travelers to the region. CDC infection control guidelines which were released today by CDC will be included.

## **Situational Summary**

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

The drought could result in severe impacts to the municipal water supplies, wells, agriculture (plants and livestock) and firefighting capabilities for several months. The SOC continues to be activated to monitor the situation statewide, and support regional and local operational areas.

- On 7/15/14 the State Water Resources Control Board passed a new emergency regulation to reduce outdoor urban water use. The regulation makes an exception for health and safety circumstances. Local agencies can ask courts to fine water users up to \$500.00 a day and the SWRCB can fine water agencies up to \$10,000.00 per day. The adopted regulations are expected to go into effect by August 1, 2014 and remain in effect for 270 days.

- Current Reservoir Levels continue to decline. Pine Flat had a 5% decrease from last week. Levels as of July 30: Don Pedro 44%; Exchequer 21%; Folsom Lake 42%; Lake Oroville 36%; Millerton Lake 53%; New Melones 26%; Pine Flat 14%; San Luis 23%; Lake Shasta 35%; Trinity Lake 36%; Pyramid Lake 93%; and Castaic Lake 47%.

### Situational Summary

- **Drought Top Environmental Concern of Californians, PPIC Report Finds:** A newly released survey by the Public Policy Institute of California (PPIC) reveals that drought and wildfires are at the top of the list of public worries about the impacts of global warming. The survey also found that 75% of respondents believe public water agencies should require residents to reduce water use.

- The 2014 Governor Drought Task Force continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
- The DWR has released a list of unmonitored high and medium priority groundwater basins. As outlined in California's Water Code, some counties and groundwater management agencies in unmonitored basins may be ineligible for water grants and loans administered by the state.
